*The recommended support brackets for Acrylic Poles are based on lightweight sheers and cotton prints. Blackout, lined applications or anything heavier may require more support.

Please contact Customer Service for lengths longer than 24 Ft.

RECOMMENDATIONS AND INSTALLATION TIPS

FINISHES

All natural stone and shells used in Designer's Choice Exotica Collection may vary in color from piece to piece due to the natural materials used. All Photography is at best, a representation of color, actual finishes may vary slightly.

RECOMMENDATIONS

Please consult a professional installer for the application of all drapery hardware products.

We recommend a minimum of three support brackets for every 8 feet of pole length. Please refer to the Bracket Support Guide for more details on Page 16.

1 3/8" Acrylic poles require support brackets every 3 feet of pole length. The recommended support brackets for Acrylic Poles are based on lightweight sheers and cotton prints. Blackout, lined applications or anything heavier may require more support and should be determined by your installer.

When a pole is re-cut to be made smaller, a new opening/hole will need to be made. That opening should be 3/16" or 5mm to allow for the finial screw to fit properly into the drapery pole.
